

Crimson Tide PLC - TIDE mpro5 healthcare update
Released 08:38 05-Jul-2018

RNS Number : 7090T
Crimson Tide PLC
05 July 2018

Crimson Tide plc ("Crimson Tide" or the "Company")

Continued investment in mpro5 for healthcare sees GCloud accreditation contract awards.

Crimson Tide is pleased to announce it has continued to add subscribers in the healthcare sector from its investments in R&D and marketing. Critical to our growth in the UK healthcare sector and specifically the public bodies responsible for delivery, it is also with great pleasure that the Company announces that mpro5 has been accepted to GCloud 10, the government marketplace for applications.

A global healthcare organisation has completed a second successful pilot of mpro5 for the identification and reporting of falsified and fraudulent medication. These pilots have been carried out in emerging nations where the effectiveness of contraceptives and anti-malarial medicines are critical to the economic and social development of the country as a whole. mpro5 has positively detected multiple instances of falsified medicine in the pilot areas. The Company is hopeful that further collaboration could lead to full rollouts in the pilot countries and other uses of mpro5 are under discussion.

Crimson Tide is in the process of adding a new biometric time and attendance module to mpro5 for a NHS trust in the North West of England, leveraging scanning capabilities to guarantee correct identification of individuals arriving on site.

The Company has also won a contract to aid AVM Services, which operates within Cambridge University Hospitals NHS Foundation Trust, with decontamination activities which are conducted in accordance with standardised UK regulatory procedures. mpro5 allows the scheduling of regular tasks in respect of porous loads and instruments including sterilizers, disinfectors and endoscopes. The commissioning of decontamination equipment is achieved through an mpro5 workflow that automatically awards the relevant compliance or commissioning document based on a complex scoring method.

A variety of our existing facilities management clients have continued the rollout of 49 point NHS cleaning compliance checks adding an increasing

number of healthcare facilities to the locations where mpro5 is in daily use.

Crimson Tide's Executive Chairman, Barrie Whipp commented. "It is pleasing to hear of the NHS commitment to mobile applications for patients. mpro5 is a tactical solution to healthcare scenarios for not only patients, but clinicians and organisations that participate in the healthcare supply chain. We are now GCloud approved allowing us to push on with our investments and bring real change to processes in the state and private sector, locally and internationally"
