Significant contract wins in the rail sector

Crimson Tide Plc (TIDE) announces a series of major contract awards with the rail sector totalling in excess of £600,000 of long term contracted revenue.

Two major **Network Rail** managed stations in London have invested in mpro5 to not only remove the vast amount of paper from the station operations but also ensure that remedial actions raised from auditing or incidents are digitized automatically and followed through to conclusion via defined workflows.

Following a highly successful first year of operation in the train presentation area, we are delighted to announce that **Chiltern Railways**, having experienced the value and benefits in their business have extended and expanded the subscription to cover safety, procurement, human resources, revenue protection, security and engineering departments resulting in a significant increase in monthly subscriptions.

Having worked with the innovation team and our partner Samsung throughout 2019, **MTR Elizabeth Line** have chosen to invest in mpro5 as their strategic workflow tool of choice. Initially deployed in some high priority departments and activities totally without digitization tools, the ambition over the next twelve months is to deploy across further staff replacing legacy, outdated or less functionally rich applications to make mpro5 the default workflow tool.

Barrie Whipp, Executive Chairman commented: "Within eighteen months of entering a sector, we are contracted to, or in discussions with, the majority of major players in the rail business in the UK. Our team has embraced the industry, learnt from some fantastic partners and are delivering real value day in, day out. mpro5 has a very real opportunity of becoming an industry standard tool, and from the feedback we are getting from our clients, it should be".
